

4 WAYS TO FUTURE-PROOF YOUR

SOFTWARE IT BUDGET

Reduce, reuse and recycle

Know if licenses are actively being used, and utilize information to manage licenses more efficiently and establish best practices in the organization.

Encourage best practices

Analyze workflow patterns to help software users perform more effectively by providing targeted support and implementing better work processes.

Establish accountability through IT chargeback

Implement fair and reliable chargeback mechanisms to see which assets are in use and what they cost, for better valuation of IT services and to drive better informed decisions.

Renegotiate software contracts

Enable organizations to better negotiate with their software vendors by using accurate usage reports to justify agreements that match the documented usage and predictive forecast of their software licenses.
