Centralized License Integration and Management System (CLIMS)

☑ Manage licenses, option files and daemons from a central location

☑ Maximize license availability through real-time administration

☑ Minimize downtime through efficient administration and monitoring

KEY BENEFITS

- Central administration of license files and option files

- Reduce manual configuration through auto-discovery of license daemons available from the network

- Real-time viewing of license server and license expiration status

- Improve license availability by efficiently performing license server administration in real time

- Reduce license denials and improve license availability by freeing up dormant licenses

Open iT Centralized License Integration and Management System (CLIMS) is an advanced system that provides administrators a centralized portal for administration and management of license files and license servers.

CLIMS offers a broad range of functionalities to assist administrators in managing license usage and utilizing option files in license servers:

- Issuance of remote orders to license server, such as Start, Stop and Restart

- License and option file editor and syntax checker

- Auto-discovery of license daemons available from the network

- Detailed version tracking and rollback

- Remote license server administration

- Interface for viewing debug logs for troubleshooting

- Real-time dashboard for monitoring license server status

OPTIMAL LICENSE MANAGEMENT AND ADMINISTRATION

CLIMS enables centralized administration and management of all FLEXlm / FlexNet Publisher and Reprise license servers in the organization. The portal allows administrators to manage and control all license servers across the enterprise in just one single interface.

CLIMS can be used alongside with Open iT License*Analyzer*™ *2022* to effectively manage and optimize the use of expensive engineering applications.

License Managers

AUTO-DISCOVERY OF AVAILABLE LICENSE DAEMONS

CLIMS provides all the relevant information for license monitoring and administration. The portal shows all the features and packages associated with each license file, including feature version, number of available licenses, and license expiration information.

ISSUE REMOTE COMMANDS TO LICENSE SERVERS

With CLIMS, Administrators can issue remote orders to the license servers such as Start and Stop with ease and in one single view.

DETAILED VERSION TRACKING AND ROLLBACK

Advanced users of CLIMS can have full control over license and options files, providing them the capability to easily update the license files and option files through the portal. CLIMS also comes with detailed version tracking and rollback functionality to help administrators record the changes to the files and recall specific versions later.

ABOUT OPEN IT, INC.

Open iT metering and optimization tools equip Software and IT Asset Managers with advanced usage analytics to simplify the complexities of managing specialized engineering applications across a variety of license managers as well as other applications and web applications that are not using license managers.

Open iT solutions provide fully customizable usage reporting, granular chargeback for software license usage, and automated, industry-leading license harvesting capabilities across Windows, Unix and Linux platforms.
