3. RESTRICTIONS ON SOFTWARE LICENSE USE

3.1. Customer acknowledges and agrees that the Licensed Products comprise valuable trade secrets and confidential, proprietary information of Open iT. Customer shall keep confidential and protect the Licensed Products (including all copies) and the contents thereof from unauthorized access, use, copying, publication, disclosure, or distribution. Customer shall use the same degree of care (but in no event less than a reasonable degree of care) to protect the Licensed Products as it uses to protect its own trade secrets and confidential, proprietary information of similar importance.

3.2. Customer may make reasonable copies of the Licensed Products for archival and backup purposes. In addition, Customer may copy the Software License as reasonably necessary to use the same for its intended purpose and may copy the on-line Documentation as reasonably necessary to support its authorized users. Each such copy shall include Open iT’s product identification, copyright notice and other proprietary rights notices. Customer may not copy the Licensed Products or any part thereof except as provided in this Master Agreement. Customer shall not sublicense, rent, lease, lend, transfer, resell, reprint, or otherwise distribute the Licensed Products to any third party, and shall keep the Licensed Products free and clear of all claims, liens and encumbrances.

3.4. Customer shall not release or publish the results of any performance or benchmarking tests or functional evaluation or any other analysis relating to the Licensed Products without the written permission of Open iT which may be withheld or denied in Open iT's sole discretion.

Customer may not remove any product identification, copyright notice, or other proprietary rights notice from the Licensed Products.

5. INDEMNITY

5.1. Open iT will defend any action brought by a third party against Customer to the extent that such action is based on a claim that the Licensed Products or any part thereof, used within the scope of the license granted herein, infringe a copyright, trade secret or United States/WIPO patent; and agrees to pay costs and damages finally awarded in such action, provided that Customer promptly notifies Open iT in writing of any such claim and permits Open iT to have sole control of the defense or settlement of any such claim or claims.

5.3. In the case of any actual or possible claim of intellectual property infringement, Open iT shall be entitled, at its option, either to make modifications to the Licensed Product to make it non-infringing; or to terminate the license for the Licensed Product by payment to Customer in an amount equal to the perpetual License Fee paid by Customer for the Licensed Product giving rise to the claim less two per cent (2%) per month for each month elapsed from the Effective Date to the date of termination of the license. For time-based subscriptions, the payment to Customer will be prorated from the Effective Date to the date of termination of the Subscription.

5.4. In no event shall Open iT be liable for incidental, consequential, punitive, special, exemplary, speculative, or indirect damages arising out of the use of the Licensed Products or damages for loss of opportunity or lost profit or lost savings. Any warranties of non-infringement are hereby expressly disclaimed.

7.3. In case the Licensed Capacity has been exceeded for two or more months during Duration, Customer will be required to adjust the License Capacity based on the actual user or usage count. The License Capacity for the Licensed Product may only be increased or decreased pursuant to a new signed or amended Order Form.

8.4. For a Hosted Service, Open iT's policy regarding data retention and access for reporting is current calendar year plus two (2) historical years of metered data. Open iT Support will use commercial reasonable efforts to expeditiously resolve each issue to the satisfaction of the Customer. Open iT Support will act on any issues reported by Customer (each “**Support Request**”). Open iT Support will respond to Customer’s submission of a Support Request within 4 business hours after submission.

Likewise, Open iT Support will help the Customer in solving issues related to the running of the Software that is determined to be caused by factors external to the Software (e.g., configuration errors by Customer, factors related to the hardware environment, etc.), but does not have a contractual obligation to resolve such issues.

Support Levels

Open iT definitions of Support Levels are as follows:

Table 1:

Level 1 (1st line Support)	Level 2 (2nd line Support)	Level 3 (3rd line Support)	Level 4 (Development & QA)
<ul style="list-style-type: none">• Customer assistance• General problem investigation & reproduction• Patch distribution	<ul style="list-style-type: none">• Advanced problem investigation & reproduction• Configuration workarounds, patch distribution and installations	<ul style="list-style-type: none">• Temporary patches• Code level workarounds• Bug reproduction and logging	<ul style="list-style-type: none">• Patch development & testing• Patch packaging

Problem Severity and Response Times

Open iT Support categorizes issues by severity as follows:

Table 2:

Severity 1: Fatal	Severity 2: Serious	Severity 3: Medium	Severity 4: Minor
<p>Irreversible loss of data collection from tier-1 applications</p> <p>Causing non-Open iT applications or system to fail.</p>	<p>Major functionality does not work</p> <p>No workaround.</p>	<p>Functionality does not work</p> <p>Major defect has workaround</p>	<p>Minor functionality defect</p> <p>Request for information or enhancement</p>

Open iT Support assigns response times for issues based on their severity. The response times in the chart shown below indicate the targets for providing an initial action plan, and progress updates:

Table 3:

Severity	Initial Action Plan		Progress Updates	
	Standard	Premium	Standard	Premium
1	Within 4 hours	Within 1 hour	Every 2 days	Every 2 days
2	1 Day	1 Day	Every 5 days	Every 5 days
3	3 Days	3 Days	Every 10 days	Every 10 days
4	3 Days	3 Days	Every 10 days	Every 10 days

“Within 4 hours” mean within 4 effective business hours. A response can normally be expected within the same business day, but if an issue is reported late in the day, the response will be on the next business day counting 4 effective business hours. (For an issue reported late on a Friday the obligation (for Standard Support) is to respond within 4 effective business hours on Monday morning).

What Information to Provide in a Support Request

To expedite the problem resolution process, Customer needs to provide the following information when first contacting Open iT Support.

- A sense of the urgency/ priority of the issue. This priority must be as accurate as possible as Support treats urgent requests very seriously.
- Version numbers of the Open iT Software and the Operating System.
- Accurate, concise, technical English description of the problem, including steps necessary to reproduce a problem, if known.
- Console/screen output showing the problem.
- Relevant configuration files.
- Error logs.

Failure to provide the above information can result in unnecessary delays in resolving the problem.

Reporting issues by e-mail

1. Customer sends email to support@openit.com with a short description and severity of the issue in the subject of the mail.
2. The request is logged into the Open iT Support database, and a request ID is generated.
3. Customer receives an automatic reply message indicating the request ID, and a questionnaire asking Customer to supply additional info (e.g., severity) if it has not been provided. If Customer does not receive this auto reply message, Customer's Support Request has not been logged into the Open iT Support database, and the original request should be resent or Customer can contact Support by phone.
4. Customer will receive an initial action plan via email or call from 1st line Support.
5. Subsequently, the same 1st line Support engineer will work with Customer until the problem is resolved or until the problem needs to be escalated to 2nd line Support.
6. If the problem needs to be escalated to a 2nd line Support engineer, Customer will be notified of the escalation. A problem is typically escalated to 2nd line Support if the problem requires code level investigation.
7. 2nd line Support will work with Development to resolve the problem. The same 2nd line Support engineer will work with Customer until the problem is resolved.
8. The Support Request is closed when it is mutually agreed upon by Support and Customer that the issue has been resolved, or if there is no response from Customer to request for additional information within 5 days.

Reporting issues by phone

Call the local Open iT office (given in Section 2 of Order Form) to initiate a Support Request or to follow up on an open Support Request. During office hours, a 1st line Support engineer will normally be available to provide Support assistance. If a Support engineer is not immediately available, Customer will be contacted within 2 hours of submitting a Support Request by phone.

Supported Versions

Support is available to the current and past versions based on their release status¹ as indicated in the via the weblink referenced in the following paragraph. **"Full Support"** is available for an official released version for one year following the release of a newer version. **"Critical Bug Fix Support"** will be available for an official released version for two years following the release of a newer version. After this period of time, Supplier has is no obligation to provide Support for an official released version.

The Open iT Web Customer Area, has an overview of supported **versions** and **patches** available for download. If there is a problem with access to the Customer Area, please contact sales@openit.com for username and password.

Open iT delivered as a Hosted Service

If Customer reaches the Open iT Portal on the hosted platform but are not able to access Customer Data on usage, then this is defined as an Open iT support issue, for which the response times for Open iT Support Procedures (detailed above) will apply.

¹ For Early Availability (EA) versions, Open iT is not obligated to support the EA version after the superseding official released version has been released.

2. SERVICE LEVEL COMMITMENT FOR HOSTED SERVICES (IF APPLICABLE)

If Open iT is providing Hosted Services, the hosting service provider will be identified on the applicable Order Form (the “Hosting Provider”).

The Service Level Agreements (“SLAs”) offered for Hosted Services will reflect the service level of the Host Provider.

The Service Level Commitments outlined below represent the hosted service level guarantee concerning up-time and availability (“Availability Guarantee”) offered by Microsoft Azure as the Hosting Provider. (SLAs for Amazon Web Services (AWS) may deviate from these SLAs).

The Hosted Services will be available to Customer on a 24x7 basis and the Availability Commitment Level is greater than 99.98%.

Calculation of Uptime / Availability:

Customer shall measure uptime performance during a calendar month based on the following calculation:

$$\frac{\text{Available Minutes} - \text{Unscheduled Downtime}}{\text{Available Minutes}}$$

Calculation of the Availability Commitment Level excludes downtime due to Scheduled Maintenance and Emergency Maintenance.

- “Scheduled Maintenance” is defined as the period of time used to apply required patches to the IT infrastructure to ensure the continued security, availability, and performance of the system. Customer will be provided a minimum of two (2) weeks advance notice of Scheduled Maintenance.
- “Emergency Maintenance” is downtime associated with the application of required IT infrastructure patches that are unplanned.

Customer will be given notice of Scheduled Maintenance at least two weeks in advance which will be used to apply required patches to the IT infrastructure to ensure the continued security, availability, and performance of the system.

Open iT shall provide Customer remedies for any Open iT failure to meet the Availability Guarantee during any single calendar month (“**Service Period**”). Open iT shall provide a Service Credit to Customer as described below:

Availability Guarantee Service Credit	
98 % — 99.98%	5% of Monthly Charge
95 % — 97.99%	10% of Monthly Charge
Below 95%	25% of Monthly Charge

Open iT will apply any Service Credits only against future amounts due for Hosted Service Fees. Service Credits will not entitle Customer to any refund or payment from Open iT. If Service Credits are issued for two (2)

consecutive months or for three (3) months during any six (6) month period, Customer shall have the right to terminate for material breach without further notice.

To receive Service Credits, Customer must submit a claim by opening an Open iT support ticket, that identifies this as an “SLA Credit Request”. The ticket should specify the dates and times of each unavailability incident that Customer is claiming.

If the Monthly Uptime Percentage of such request is confirmed by Open iT and is less than the Availability Guarantee, then Open iT will record this as a Service Credit.

At the end of the Service Period, the Service Credits will be added up. If Customer decides to do an annual renewal, the accumulated Service Credits will be deducted from the new annual renewal fee. If Customer will not renew, the Service Credits will be lost.

A link to the Host Provider’s specification of service levels (“SLAs”) is also provided in the Order Form if a Hosted Service is ordered.

Service Credits apply only to unavailability of the Hosted Service. If Customer reaches the Open iT Portal on the hosted platform but are not able to access Customer Data on usage, then this is defined as an Open iT support issue, for which the response times for Open iT Support Procedures (detailed above) will apply.

3. ADDITIONAL SOFTWARE COMPONENTS (IF APPLICABLE)

Customer On-prem installation

The Open iT Software License may require additional third-party software components for its operation. Such components, if not made available by Customer, shall be provided and installed by Open iT under the terms provided by the component’s original software vendor to the licensor (Company).

A copy of the original software vendor End User License Agreement is provided as a separate document.

Additional technical comments on the MS-SQL Server runtime restrictions:

- (a) The MS-SQL Server Runtime license needs to be assigned to a physical server but can be executed in any Virtual Machine running on that server.
- (b) The MS-SQL Server Runtime license cannot be assigned to a different physical server more frequently than every 90 days. There are exceptions to this rule, see the attached Microsoft EULA.
- (c) According to Microsoft’s commercial policies, License Mobility (i.e. dynamic virtual machines) can only be acquired by enrolling a product license in the “Software Assurance Program”. ISV licenses, such as the MS-SQL Server Runtime, do not qualify for joining that program.

Hosted Service installation

For a hosted environment, the MS-SQL license is included on the instance/vm.
