Open iT® Optimizer for SAP® Licensing

☑ Gain control over your SAP licenses and be audit-ready

☑ Appropriate the most efficient license type for each user

☑ Avoid unnecessary costs on SAP licensing and maintenance

KEY BENEFITS

- Provide a clear view of the purchased licenses and the current licensing

- Compare allocations under different licensing methods including the customized method by Open iT

- Identify inactive, underused, and duplicate user accounts

- Provide detailed audit reports for all users including current usage and optimized licensing

- Ensure compliance and optimal usage of SAP licenses

- Reduce the manual effort to prepare and execute license audits

Due to the complexity of SAP® licensing, enterprises across the globe struggle to manage their SAP resources. In order to invest efficiently on their SAP licenses, enterprises should ask the right questions:

- *How many SAP licenses does the company really need?*
- *Which license types match the users' usage patterns?*
- *Which user accounts are inactive, underused or duplicated?*

Open iT Optimizer for SAP Licensing allows administrators to answer these problems with reports that are recognized by SAP. Our solution is especially useful prior to purchasing new SAP licenses and before affording annual maintenance and services.

- Pinpoint inactive and under-active users

- Pinpoint duplicate license counts

- Match user accounts to their respective employees to avoid unnecessary, multiple license entitlements

- Reclassify licenses based on actual usage patterns

- Provide a platform to map and combine SAP systems, transactions and users

- Provide graphics and statistics of SAP usage

- Employ fast, easy, non-intrusive installation that's external to the SAP system

- Available either as SaaS/Cloud model or as classic enterprise software

SAP Metering and Optimization
Integration with SAP Applications

Open iT Optimizer for SAP Licensing tracks the actual behavior of each SAP user across the enterprise. By using Open iT Optimizer for SAP Licensing, companies can rest assured that they are neither be under- nor overlicensed.

Limited Professional	120	109	11	244	-124	247	-127
Professional	1,150	662	488	89	1,061	192	958
Unclassified		56	-56	24	-24		
Total	**1,322**	**873**	**449**	**873**		**873**	

RECLASSIFICATION METHODS

- **By Amount of Activity** (Counting Dialog Steps) - Arrange overall licensing based on how many dialog steps the individual users have incurred

- **By Type of Activity** (Spread of Use/Counting the Number of Transactions Used) - Arrange overall licensing based on how many transaction codes the individual users have incurred

- **By Activity Groups** (Inspects User's Actual Activities/ Separates all Transactions into Groups) - Arrange overall licensing based on transaction or activity groups tied to their respective license types

- **By Customized Method** - Arrange overall licensing based on a custom method, which combines other licensing methods, to suit the company's licensing agreement and situational needs

OPTIMIZER FOR SAP SAVES ENTERPRISES A WHOPPING:

- 50%-90% for each re-classified license
- 100% on dormant accounts
- 100% on multiple username accounts
- 50% on license management resources
- OVER 15% on total maintenance fees

ABOUT OPEN IT, INC.

Open iT metering and optimization tools equip Software and IT Asset Managers with advanced usage analytics to simplify the complexities of managing specialized engineering applications across a variety of license managers as well as other applications and web applications that are not using license managers.

Open iT solutions provide fully customizable usage reporting, granular chargeback for software license usage, and automated, industry-leading license harvesting capabilities across Windows, Unix and Linux platforms.
