

Open iT SaaS

Software License Management.
Simplified. Optimized. Audit-Ready.

Modern organizations rely on complex software environments spanning SaaS, cloud, and on-premises systems. Yet many still lack visibility into how their software is actually used.

The result?

- Rising software costs
- Unused or underutilized licenses
- Increased pressure during vendor audits

Open iT SaaS gives you complete visibility and control.

What is Open iT SaaS?

Open iT SaaS is a **cloud-based software license management solution** that delivers real-time visibility into software usage across your entire IT environment.

- Track software usage across SaaS, cloud, and on-prem systems
- Optimize license allocation based on real demand
- Reduce unnecessary software spending
- Prepare for vendor audits with accurate, defensible data

Built for Complex Software Environments

Open iT SaaS is designed to support even the most complex enterprise environments.

Environments

This broad compatibility ensures organizations can gain visibility across their entire software landscape—without gaps or blind spots.

Why Open iT SaaS?

Today's IT environments are more complex than ever:

- Multiple licensing models (subscription, token, usage-based)
- Distributed teams and hybrid infrastructure
- Growing SaaS adoption
- Increasing vendor audit activity

Without a centralized solution, organizations struggle with:

- Limited visibility into software usage
- Overprovisioned or unused licenses
- Fragmented tools and data
- Unpredictable software costs

Open iT SaaS solves this by providing unified visibility and actionable insights across your entire software landscape.

How Open iT SaaS Works

Data Collection
