Open iT Support

Open iT Support is responsible for any issues with the Open iT Software that are related to the running of the Software itself, and installation and/or configuration if that has been performed by Open iT personnel. Open iT Support will use commercial reasonable efforts to expeditiously resolve each issue to the satisfaction of the Customer. Open iT Support will act on any issues reported by Customer (each “**Support Request**”). Open iT Support will respond to Customer’s submission of a Support Request within 4 business hours after submission.

Likewise, Open iT Support will help the Customer in solving issues related to the running of the Software that is determined to be caused by factors external to the Software (e.g., configuration errors by Customer, factors related to the hardware environment, etc.), but does not have a contractual obligation to resolve such issues.

Open iT Support exists to improve Customer’s experience with Software. Open iT Support will do its best to resolve all issues in a timely and expedient fashion.

Open iT Support comes with two options Standard Support and Premium Support. All Subscriptions are offered with Standard Support included. Standard Support is generally provided on a 24/5 basis (excluding Saturdays/Sundays) and Premium Support on 24/6 (excluding Sundays), with response times as detailed below:

Support Levels

Open iT definitions of Support Levels are as follows:

Table 1:

Level 1 (1st line Support)	Level 2 (2nd line Support)	Level 3 (3rd line Support)	Level 4 (Development & QA)
○ Customer assistance ○ General problem investigation & reproduction	○ Advanced problem investigation & reproduction ○ Configuration workarounds,	○ Temporary patches ○ Code level workarounds	○ Hotfix development & testing ○ Hotfix packaging

○ Hotfix distribution	hotfix distribution and installations	○ Bug reproduction and logging	
-----------------------	---------------------------------------	--------------------------------	--

Problem Severity and Response Times

Open iT Support categorizes issues by severity as follows:

Table 2:

Severity 1: Fatal	Severity 2: Serious	Severity 3: Medium	Severity 4: Minor
○ Irreversible loss of data collection from tier-1 applications ○ Causing non- Open iT applications or system to fail.	○ Major functionality does not work ○ No workaround.	○ Functionality does not work ○ Major defect has workaround	○ Minor functionality defect ○ Request for information or enhancement

Open iT Support assigns response times for issues based on their severity. The response times in the chart shown below indicate the targets for providing an initial action plan, and progress updates:

Table 3:

Severity	Initial Action Plan		Progress Updates	
	Standard	Premium	Standard	Premium
1	Within 4 hours	Within 1 hour	Every 2 days	Every 2 days
2	1 Day	1 Day	Every 5 days	Every 5 days
3	3 Days	3 Days	Every 10 days	Every 10 days
4	3 Days	3 Days	Every 10 days	Every 10 days

“Within 4 hours” mean within 4 effective business hours. A response can normally be expected within the same business day, but if an issue is reported late in the day, the response will be on the next business day counting 4 effective business hours. (For an issue reported late on a Friday the obligation (for Standard Support) is to respond within 4 effective business hours on Monday morning).

What Information to Provide in a Support Request

To expedite the problem resolution process, Customer needs to provide the following information when first contacting Open iT Support.

- A sense of the urgency/ priority of the issue. This priority must be as accurate as possible as Support treats urgent requests very seriously.
- Version numbers of the Open iT Software and the Operating System.

- Accurate, concise, technical English description of the problem, including steps necessary to reproduce a problem, if known.
- Console/screen output showing the problem.
- Relevant configuration files.
- Error logs.

Failure to provide the above information can result in unnecessary delays in resolving the problem.

Reporting issues by e-mail

1. Customer sends email to support@openit.com with a short description and severity of the issue in the subject of the mail.
2. The request is logged into the Open iT Support database, and a request ID is generated.
3. Customer receives an automatic reply message indicating the request ID, and a questionnaire asking Customer to supply additional info (e.g., severity) if it has not been provided. If Customer does not receive this auto reply message, Customer's Support Request has not been logged into the Open iT Support database, and the original request should be re-sent or Customer can contact Support by phone.
4. Customer will receive an initial action plan via email or call from 1st line Support.
5. Subsequently, the same 1st line Support engineer will work with Customer until the problem is resolved or until the problem needs to be escalated to 2nd line Support.
6. If the problem needs to be escalated to a 2nd line Support engineer, Customer will be notified of the escalation. A problem is typically escalated to 2nd line Support if the problem requires code level investigation.
7. 2nd line Support will work with Development to resolve the problem. The same 2nd line Support engineer will work with Customer until the problem is resolved.
8. The Support Request is closed when it is mutually agreed upon by Support and Customer that the issue has been resolved, or if there is no response from Customer to request for additional information within 5 days.

Reporting issues by phone

Call the local Open iT office (given in Section 2 of Order Form) to initiate a Support Request or to follow up on an open Support Request. During office hours, a 1st line Support engineer will normally be available to provide Support assistance. If a Support engineer is not immediately available, Customer will be contacted within 2 hours of submitting a Support Request by phone.

Open iT Software Provided as SaaS

If Customer can access the Open iT Portal on the SaaS platform but cannot access Customer Data or usage reports, the incident will be treated as an Open iT Support issue, and the response times stated in the Standard Procedures for Open iT Support Services will apply.

2. SERVICE LEVEL FOR OPEN IT SOFTWARE AS A SERVICE (SAAS)

The Service Level applicable to Open iT Software provided as SaaS reflects the service level offered by the applicable Hosting Provider.

The Service Level outlined below represents the Availability Guarantee offered by Microsoft Azure as the Hosting Provider. (SLAs for Amazon Web Services (AWS) may deviate from these SLAs).

Software Licenses will be available to Customer on a 24x7 basis with a service level commitment of greater than 99.98%.

Calculation of Uptime / Availability:

Customer shall measure uptime performance during a calendar month based on the following calculation:

$$\frac{\text{Available Minutes} - \text{Unscheduled Downtime}}{\text{Available Minutes}}$$

Measurement of the agreed Service Level excludes downtime due to Scheduled Maintenance and Emergency Maintenance.

- “Scheduled Maintenance” is defined as the period used to apply required fixes to the IT infrastructure to ensure the continued security, availability, and performance of the system. Customer will be provided a minimum of two (2) weeks advance notice of Scheduled Maintenance.

- “Emergency Maintenance” is downtime associated with the application of required IT infrastructure fixes that are unplanned.

Customer will be given notice of Scheduled Maintenance at least two weeks in advance which will be used to apply required hotfixes to the IT infrastructure to ensure the continued security, availability, and performance of the system.

Open iT shall provide Customer remedies for any Open iT failure to meet the Availability Guarantee during any single calendar month. Open iT shall provide a Service Credit to Customer as described below:

Availability Guarantee Service Credit

98 % — 99.98%	5% of Monthly Charge
95 % — 97.99%	10% of Monthly Charge
Below 95%	25% of Monthly Charge

Open iT will apply any Service Credits only against future amounts due for SaaS fees. Service Credits will not entitle Customer to any refund or payment from Open iT. If Service Credits are issued for two (2) consecutive months or for three (3) months during any six (6) month period, Customer shall have the right to terminate for material breach without further notice.

To receive Service Credits, Customer must submit a claim by opening an Open iT support ticket, that identifies this as an “SLA Credit Request”. The ticket should specify the dates and times of each unavailability incident that Customer is claiming.

If the unavailability incident of such request is confirmed by Open iT and is less than the Availability Guarantee, then Open iT will record this as a Service Credit.

At the end of the calendar month, the Service Credits will be added up. If Customer decides to do an annual renewal, the accumulated Service Credits will be deducted from the new annual renewal fee. If Customer will not renew, the Service Credits will be lost. Total service credits in any 12-month period shall not exceed 20% of the annual SaaS fees.

A link to the Hosting Provider’s applicable service-level specifications will be provided in the Order Form when a SaaS installation is ordered.

Service Credits apply only to unavailability of the Host Provider. If Customer reaches the Open iT Portal on the SaaS platform but is not able to access Customer Data on usage, then this is defined as an Open

iT support issue, for which the response times for Open iT Support Procedures (detailed above) will apply.

Data retention and access to reports is current calendar year plus two (2) historical years of metered data. Customer's direct access to data older than the standard policy of current plus two (2) years metered data may be subject to additional fees.

3. ADDITIONAL SOFTWARE COMPONENTS (IF APPLICABLE)

Customer On-prem installation

Licensed Products may require additional third-party software components for its operation. Such components, if not made available by Customer, shall be provided and installed by Open iT under the terms provided by the component's original software vendor to the licensor (Company).

A copy of the original software vendor End User License Agreement is provided as a separate document.

Additional technical comments on the MS-SQL Server runtime restrictions:

- (a) The MS-SQL Server Runtime license needs to be assigned to a physical server but can be executed in any Virtual Machine running on that server.
- (b) The MS-SQL Server Runtime license cannot be assigned to a different physical server more frequently than every 90 days. There are exceptions to this rule, see the attached Microsoft EULA.
- (c) According to Microsoft's commercial policies, License Mobility (i.e. dynamic virtual machines) can only be acquired by enrolling a product license in the "Software Assurance Program". ISV licenses, such as the MS-SQL Server Runtime, do not qualify for joining that program.

SaaS Installation

For SaaS deployments, the applicable Microsoft SQL Server license is included with the hosted instance or virtual machine.

4. SHARING ANONYMIZED CUSTOMER DATA (IF APPLICABLE)

This section applies if Customer has agreed to share its own usage data for benchmarking or research purposes.

Open iT Benchmarking. Open iT may use anonymized usage data provided by Customer to create aggregated benchmarks and usage patterns across industries, verticals, and company sizes. Such aggregated results may be shared with participating Customers, allowing them to compare their own usage patterns with industry averages or with companies of similar size and sector. At no time will Open iT share individual Customer's raw anonymized data directly with any other company.

4.1 **Reciprocity.** When Customer shares its own anonymized data, Customer will likewise get access to anonymized data from other customers that have accepted similar sharing provisions and thereby gain understanding of their own usage in relation to similar companies.

4.2. **Discount.** There will be a discount for Customer that allows for sharing of Customer Data. The discount will be agreed between Customer and Open iT and will be reflected in the Fees specified in the Order Form or Quotation.

4.3. **Anonymization techniques.** Open iT has several ways to mask usernames; one option for data anonymization is when Customer Data is collected, where the anonymization process is irreversible, i.e. actual usernames cannot later be retrieved. Another option is anonymization at the processing level; where it is possible to reveal the username at a later stage but will require skills and reprocessing of the data to get the real name behind the masked data. And finally, anonymization at the reporting interface level, where the process is reversible, i.e. anonymization can later be turned off to reveal actual usernames. Open iT and Customer will separately agree on the anonymization technique to be used.
